## Terms and Conditions

**For group bookings, please ensure that everyone in your group is aware of the following...**

- Must be 14 years or over (parent must be present if under 18 years).
- Maximum weight of participants is 100 kg (220 pounds).
- Deposit of \$100 per person **must be paid to secure booking**. This deposit is **non-refundable** but is transferable to another day or person within a 12 month period. However, more than **48 hours notice must be given** if you need to postpone your jump, otherwise you will lose your deposit. (Unless Doctor's Certificate is produced).
- You will be given an arrival time, but please note that this is not the jump time, as paperwork, training, gearing up and the plane ride all take time. This all normally takes 60 to 90 minutes but weather variables, your jump altitude and if you are with a group, can all affect the time it takes to do your jump. You should allow a few hours with no time constraints.
- Weather can affect the suitability or safety of skydiving. Excessive cloud, rain, wind or turbulence may necessitate the postponement of your jump. This will be at the discretion of the Drop Zone Safety Officer. **Safety comes first**. Your jump can be re-scheduled for another day. Please note that the deposit is non-refundable but transferable to another day within 12 months. (If the weather is changeable on the day, your jump may be postponed to later in the day, provided there is an **available time slot**.)
- If any medical conditions are present, please call us before booking in, as special arrangements may have to be made. No Scuba-Diving for 24 hours prior to jumping. **No alcohol or recreational drugs to be taken for 8 hours** before jumping. Having a hangover is not recommended.
- Payment for the balance by cash, cheque/money order, EFTPOS, mastercard, visa or bankcard.
- A pair of shoes are required for the jump ... runners or similar are better than boots. Best clothing is t-shirt and shorts, preferably not jeans as these are normally too tight and restrictive.
- Turnaround is approximately 60 to 90 minutes per jumper, allowing for briefing, gear-up, plane ride, the jump, dubbing the video, and packing the parachute. At present we have one instructor, but for larger groups we may be able to organise another instructor (advanced notice needs to be given).

**For group organisers, please ensure that everyone in your group understands the above terms and conditions. I have read, understood and accept the above terms and conditions.**
